RE: Milestone M3FT-15LB0806052

Milestone M3FT-15LB0806052 is in work package FT-15LB080605. The work scope for this work package states: "Continue to review and document information on shales that can be incorporated into the GIS database. This information includes the physical, mineralogical, hydrologic and chemical characteristics of selected major shale units in the U.S." This work was put on hold in fiscal year 2015 because it feeds DR Regional Geology R&D, WBS 1.2.08.14, which was suspended for fiscal year 2015.
