PSEG Nuclear, LLC

GC-859 Pilot

Presented by:

Michelle Baca

PSEG
Nuclear LLC

- Pilot ran from Sept 2012 through May 2013
- Tested three versions of GC-859 Database
  - Version "3" is closest to what will be seen on the data request
  - Version 3 will allow for non-fuel components integral to an assembly (Schedule E) to be included as part of the fuel data (Schedule C)
- Data collection and submission
  - Time for compilation, review, and submittal – expect no less than a month

PSEG
Nuclear LLC

- All issues previously discussed during conference calls hosted by NEI
- Most common issues for all three pilots:
  - Definitions as compared to the "Standard Contract"
  - Minimum hardware requirements
  - Overwriting of database for multi-unit sites
  - Schedule F (GTCC Waste) data collection
- Issues unique to PSEG Nuclear:
  - Common ISFSI identification
  - Version "2" System compatibility
