Title: CRC Depletion Calculations for Crystal River Unit 3

Document Identifier: B00000000-01717-0210-00001 REV 00

Attachment V, Page 1 of 39

This attachment contains the consolidated SAS2H output files that were generated by CRAFT during the depletion calculations for Crystal River Unit 3 fuel batches 6A, 6B, 7A, and 7B. These files are referred to as "*.cut" files due to their ".cut" extension. The "*.cut" files are contained on an attachment tape of this calculation file (the attachment tape has been moved to Reference 7.8). The information contained in this hard-copy representation of Attachment V is a listing of the various "*.cut" files and their attributes for the fuel assemblies in batches 6A, 6B, 7A, and 7B. The file sizes listed in the following table are the file sizes as they appear on the Hewlett Packard (HP) Series 9000 workstation. The HP file sizes differ from the file sizes on the attachment tape due to the difference in the block sizes between the HP and the personal computer. The tape containing Attachment V was written using the Colorado Model T1000e External Parallel Port Backup System for personal computers.

Computer File Name	Tape Backup File Name	File Date (Output)	File Size (Bytes)	File Type (Format)

Title: CRC Depletion Calculations for Crystal River Unit 3
 Document Identifier: B00000000-01717-0210-00001 REV 00

Attachment VI, Page 1 of 33

This attachment contains the "*.notes" files that were generated by CRAFT during the depletion calculations for Crystal River Unit 3 fuel batches 6A, 6B, 7A, and 7B. These files are referred to as "*.notes" files due to their ".notes" extension. The "*.notes" files are contained on an attachment tape of this calculation file (the attachment tape has been moved to Reference 7.8). The information contained in this hard-copy representation of Attachment VI is a listing of the various "*.notes" files and their attributes for the fuel assemblies in batches 6A, 6B, 7A, and 7B. The file sizes listed in the following table are the file sizes as they appear on the Hewlett Packard (HP) Series 9000 workstation. The HP file sizes differ from the file sizes on the attachment tape due to the difference in the block sizes between the HP and the personal computer. The tape containing Attachment VI was written using the Colorado Model T1000e External Parallel Port Backup System for personal computers.

Title: CRC Depletion Calculations for Crystal River Unit 3

Document Identifier: B00000000-01717-0210-00001 REV 00

Attachment VII, Page 1 of 75

This attachment contains the consolidated SAS2H output files that were generated by CRAFT during the depletion calculations for Crystal River Unit 3 fuel batches 8 and 9 through cycle 9. These files are referred to as "*.cut" files due to their ".cut" extension. The "*.cut" files are contained on an attachment tape of this calculation file (the attachment tape has been moved to Reference 7.8). The information contained in this hard-copy representation of Attachment VII is a listing of the various "*.cut" files and their attributes for the fuel assemblies in batches 8 and 9 through cycle 9. The file sizes listed in the following table are the file sizes as they appear on the Hewlett Packard (HP) Series 9000 workstation. The HP file sizes differ from the file sizes on the attachment tape due to the difference in the block sizes between the HP and the personal computer. The tape containing Attachment VII was written using the Colorado Model T1000e External Parallel Port Backup System for personal computers.

Computer File Name	Tape Backup File Name	File Date (Output)	File Size (Bytes)	File Type (Format)

Title: CRC Depletion Calculations for Crystal River Unit 3

Document Identifier: B00000000-01717-0210-00001 REV 00

Attachment VIII, Page 1 of 68

This attachment contains the “*.notes” files that were generated by CRAFT during the depletion calculations for Crystal River Unit 3 fuel batches 8 and 9 through cycle 9. These files are referred to as “*.notes” files due to their “.notes” extension. The “*.notes” files are contained on an attachment tape of this calculation file (the attachment tape has been moved to Reference 7.8). The information contained in this hard-copy representation of Attachment VIII is a listing of the various “*.notes” files and their attributes for the fuel assemblies in batches 8 and 9 through cycle 9. The file sizes listed in the following table are the file sizes as they appear on the Hewlett Packard (HP) Series 9000 workstation. The HP file sizes differ from the file sizes on the attachment tape due to the difference in the block sizes between the HP and the personal computer. The tape containing Attachment VIII was written using the Colorado Model T1000e External Parallel Port Backup System for personal computers.

Title: CRC Depletion Calculations for Crystal River Unit 3
Document Identifier: B00000000-01717-0210-00001 REV 00

Table with 7 columns: File Name, ID, Date, Value, Unit, Code. Contains 100 rows of data for CRC Depletion Calculations.

Title: CRC Depletion Calculations for Crystal River Unit 3

Document Identifier: B00000000-01717-0210-00001 REV 00

Attachment IX, Page 1 of 36

This attachment contains the consolidated SAS2H output files that were generated by CRAFT during the depletion calculations for Crystal River Unit 3 fuel batches 10 and 11 through cycle 9. These files are referred to as "*.cut" files due to their ".cut" extension. The "*.cut" files are contained on an attachment tape of this calculation file (the attachment tape has been moved to Reference 7.8). The information contained in this hard-copy representation of Attachment IX is a listing of the various "*.cut" files and their attributes for the fuel assemblies in batches 10 and 11 through cycle 9. The file sizes listed in the following table are the file sizes as they appear on the Hewlett Packard (HP) Series 9000 workstation. The HP file sizes differ from the file sizes on the attachment tape due to the difference in the block sizes between the HP and the personal computer. The tape containing Attachment IX was written using the Colorado Model T1000e External Parallel Port Backup System for personal computers.

Computer File Name	Tape Backup File Name	File Date (Output)	File Size (Bytes)	File Type (Format)
