          *           prelim lwr origen-s binary working library--id = 1143              *
```

```
          *        made from modified card-image origen-s libraries of scale 4.2         *
          *      data from the light element, actinide, and fission product libraries    *
          *        decay data, including gamma and total energy, are from endf/b-vi      *
          *                                                                              *
          *      neutron flux spectrum factors and cross sections were produced from     *
          *     the "presas2" case updating all nuclides on the scale "burnup" library   *
          *                                                                              *
          *                  fission product yields are from endf/b-v                    *
          *                                                                              *
          *              photon libraries use an 18-energy-group structure               *
          *             the photon data are from the master photon data base,            *
          *              produced to include bremsstrahlung from uo2 matrix              *
          *                                                                              *
          *       see information above this box (if present) for later updates         *
          *                                                                              *
          ********************************************************************************
          *                                                                              *
